About Virtual Conference

If you are interested in idea of Virtual Conference, we propose some benefits, which such event certainly includes

Most people have an experience that some of the most valuable discussions at conferences occur not from the podium but in the hallway.

A Virtual Conference is a way to 'hallway conversations' where most of the conversations take place in a public dialogue that is created for each article separately. Only the conference participants have access to the chat-rooms. This is the best way to ascertain individual viewpoints and to discuss the submissions. If you like the sound of one topic you can simply join the discussion.

Here are some advantages of a virtual conference:

Saves money. No travel, accommodation, or restaurant costs.

Saves time. No travel or time away required.

Allows you to participate when you schedule your time to do so.

Same validity as face-to-face conferencing (publication, certification, etc.).

The capacity to interact with your session's participants prior to, during, and after the event.

The ability to participate in all conference session discussions (async).

Viewing of keynotes and invited submissions.

Virtual presentations are green and reduce your carbon footprint.

Less travelling means more time for your business or family.

No plane delay, passport control or other security controls.

Easy connections between the conference and time at work.

No luggage packing and unpacking, no worrying whether you have packed everything.

Communication with a wider and more global audience.

Access to reviews during the conference.

Direct discussions - connections to any conference participant.

You will learn new skills for using a virtual conference system.

Access to the conference from the comfort of your home or office.

The only cost for the conference is the conference fee. No additional costs for accommodation, hotels, travel, taxiing or any other expenses.

A Virtual Conference is an adequate and fully-fledged substitute for a standard "stone" conference.

What is a (scientific) Virtual Conference?

The virtual conference is a way of presenting results (research results) on the Internet without the necessity of physical attendance.

Conference participants do not travel anywhere.

Individual submissions are available during the whole duration of the conference, and all registered persons can discuss them in conference chat room any time.

The conference communication is smart, in addition valuable feedback and contacts get be received.

What are benefits (positives) of the virtual conference?

Participants of the conference do not travel anywhere.

The participant chooses time which suits him/her the most, to attend a particular discussion.

The participant can lead online discussions with other participants for any paper using the chat room facility any time.

Unlike a common conference, this type of conference is much more flexible.

Whom is the conference for?

The conference is open to all researchers (including students, PhD students, post graduates, companies, etc.).

There is no age limit or other restriction for participants.

Is there a conference fee?

Yes, to attend the conference it is necessary to pay a fee (fee information).

The fee covers partially technical expenses (servers, maintaining and development), conference management and administration, conference post processing, etc.

The conference fee relies to single submission. More submissions are possible for an account, but the fee must be paid for each accepted article. The publication processing fee for a research paper is 120 Euro. The publication fee is charged only for accepted paper.

Does this journals and Conferences assign DOI?

Answer: Yes. Each paper published in *IFIASA* Proceedings (ISBN, indexed in international databases and submitted for indexing in Web of Sciences). Also, the selected articles could be published in Icon of Faith (*Icoana Credinței*) or International Journal of Theology, Philosophy and Science and it is indexing by ERIHPLUS, CEEOL, DOAJ, CROSSREF, OAJ, EZB, WORLDCAT, COPAC, Google Scholar, BASE, InfoBase Index, OCLC, and other data bases, and a DOI®number, which appears beneath the author's affiliation in the published paper. Click here (<http://search.crossref.org/?q=icoana> , or <https://search.crossref.org/?q=ijtps>) to view that.
